Vol. XI., No. 18

Bowling Green State University

November 2, 1987

The work of a school of artists known for their brash imagery is being showcased at the Fine Arts Gallery through Nov. 20. Part of the New Music and Art Festival, the exhibition "Of New Account: The Chicago Imagists" features 30 pieces by eight originators of the Chicago Imagism movement which relates to certain types of surrealism and social commentary.

McMaster Institute to use grant for business series

For small and mid-sized scientific and technical companies, the thought of competing internationally can be intimidating. To help overcome such a feeling, the McMaster Leadership Institute will conduct a series of workshops over the next two years.

A \$34,000 grant from the U.S. Department of Education makes the workshops possible. "It's our first grant ever," Karen Bunting, director of the institute, said. The institute was established in 1985 through a \$1 million donation from Harold and Helen McMaster of Perrysburg. The McMaster Institute concentrates on ways in which small firms and scientific and technical industry can profit and grow in today's economic climate.

In cooperation with the University's Asian studies committee, the College of Business Administration and a private firm—Mead Imaging, which has been successful in Asian business ventures—Bunting said the institute will host the workshops during the summer of 1988 and 1989.

Next summer, the institute will invite small to medium-sized techno-scientific firms to three executive workshops, Bunting said. With the help of American firms already successful in Asia, the institute's programs will deal with the cultural aspects of three Asian countries: Korea, Japan and China.

According to Bunting, the programs will address Asian history and the countries' social aspects. "We'll also ask executives to role play in a mock business meeting and treat them to the food of Asian countries," Bunting said.

Between 1988 and 1989, workshop participants will use the learned techniques to conduct transactions in Asia while graduate students track their progress.

When the business people return for

follow-up workshops in 1989, they plan to share their experiences and obtain further advice from the institute. "The second part of the program is the most interesting," Bunting said, "because feedback will help us build a relationship with these companies." —Beth Sondgeroth

Parents Club pledges scholarship aid

With projected increases in the cost of higher education, finding every available scholarship dollar is a necessity for most students. Unfortunately, finding that aid can sometimes be like finding the proverbial "needle in the haystack."

That's why the University's Parents Club has as its project this year the funding of a computerized Scholarship Locating Service that will be able to match the qualifications and interests of Bowling Green students with various agencies, foundations, corporations and organizations, nationwide, that offer scholarships or grants.

Parents of current University students are being asked to support the scholarship project with their pledges during an Office of Development telefund that will continue through Nov. 5.

According to David Wu, development, the goal is to raise \$60,000 to cover the cost of purchasing computer hardware and software, installation and related expenses associated with getting the Scholarship Locating Service up and running at Bowling Green.

"This is a project that will benefit every student at the University," Wu said, noting that the development office is coordinating the project in conjunction with the Office of Financial Aid and Student Employment.

Why is a Scholarship Locating Service necessary at Bowling Green? Wu points

Arts Unlimited program gears up for school year

Forty-one northwest and north central Ohio schools are taking part in Arts Unlimited this year, according to Dr. Michael Moore, director of the program.

About 50 planning sessions with the schools were held in October to gear up for this year's program.

Arts Unlimited strives to make the arts an integral part of classroom instruction. To accomplish that goal, the program offers classroom teachers specialized arts instruction each summer on the Bowling Green campus and at Firelands College. It also provides teaching artists who continue to work with the teachers throughout the school year. The artists give lesson-demonstrations at the schools and there are field trips to live performances and art museums.

The award-winning, innovative program is sponsored by the University with support from the Ohio Arts Council and individual and corporate contributions.

According to Moore, 125 classroom teachers have met with 13 teaching artists to organize school visits and lesson plans for the year.

To insure the quality and effectiveness of the program, a limit has been set on the number of residencies that can be requested by each school. This year, more than 6,800 students will study music, theater, dance and visual art, Moore indicated.

The school year's work will culminate in the spring when students will see the work studied.

Shozo Sato will bring his nationally acclaimed "Kabuki Othello" to the Bowling Green campus the week of Feb. 8-12 for both public and special performances for schools participating in Arts Unlimited.

Students studying music will hear the Toledo Symphony Orchestra perform "Appalachian Spring" by Aaron Copland on March 1 and 2. Visits to the Toledo Museum of Art and dance performances

of Susan Thomasson and Rick Kitts of the New York's Lincoln Center are scheduled in April.

Participating schools include Kenwood, Crim, St. Aloysius, Wood Lane and the high school in Bowling Green; Webster, Luckey, Lemoyne and Pemberville in the Eastwood School District; Powell Elementary in North Baltimore; Maumee Valley Country Day School; Harvard School in Rossford; Toledo Glendale-Feilbach; and Maplewood in Sylvania.

Also taking part are St. Wendelin, Holmes, Riley, Field and Lowell schools in Fostoria; Clyde High School; Carey High School; Whittier Elementary in the Lima School District; Ottawa Elementary; Glandorf Elementary; Portage Elementary in the Elmwood School District; Weston Elementary in the Otsego School District;

St. Peter's in Huron; Meadowlawn, Venice Heights, St. Peter and Paul, Ontario and Glenwright Academy, all in Sandusky; Bogart School in Castalia; Bataan and Jefferson elementaries in Port Clinton; Miland Elementary; Berlin-Milan Middle School; Vermilion South Street School; Lorain Homewood; Franklin Elementary in Van Wert; and Liberty School in Ohio City.

In addition to the University and the Ohio Arts Council, financial contributors to the Arts Unlimited program for the 1987-88 academic year include Hitachi, the Arts Commission of Greater Toledo, the Ohio Humanities Council, Bartlett Insurance Agency of Bowling Green, the Bowling Green State University Senior Class Challenge, Cedar Point Amusement Park, Crim Elementary School in Bowling Green, the Cummins Engine Foundation, Falcon Plaza Best Western Motel in Bowling Green, Nordson Foundation, Toledo Trust Company and Webster Elementary School.

Career Development Center and University Placement Services. And the previous year parents' pledges funded complete renovation of the typing room in the Jerome Library.

"We have been very pleased with the parents' level of support, Wu said, noting that pledges for Parents Club projects have increased 300 percent over the past two years and in fact have grown from about \$5,000 annually in the early years of the organization to the \$55,000 pledged last year.

"We are trying to be far more program-oriented in selecting our projects for Parents Club funding," Wu said. "Each year we try to choose a program that will benefit all students at Bowling Green and will directly enhance the education offered at the University.

Wu noted that he encourages all offices and departments to submit projects for possible funding by the Parents Club to his office. "We are always accepting proposals and consider all those that will benefit all students," he said.

The Parents Club was created at the University 21 years ago with a goal of providing enhancements to students' educational opportunities. Parents Day activities scheduled on November 7 are a part of the coordinated effort to keep parents involved in their children's Bowling Green experiences.

Loyalty and pride spark alumni support

Tradition. Spirit. Loyalty. Pride. Keeping these feelings alive in the men and women who graduate from Bowling Green each year is a primary goal of the University's Alumni Association, and if the success of recent activities is any indicator, the association is achieving its goal.

With memories of a well-attended Homecoming still vivid, Larry Weiss, associate vice president of University Relations and director for alumni affairs, says his staff and the members of the Alumni Board of Trustees are working harder than ever to continue to build the Alumni Association and increase the level of alumni support and participation in the University and its activities.

More than 600 alumni attended reunion brunches as part of the September Homecoming activities, and hundreds of others met at the Alumni Center, at college and department offices or at fraternity and sorority houses to talk over old times. Graduates from select classes enjoyed special celebrations, and attendance at all reunions increased more than 95 percent over the previous year, Weiss said.

A part of the Homecoming success story is the recent emphasis on organized alumni chapters, Weiss said. Currently there are 32 active chapters throughout the country, including 12 in Ohio. Many are newly formed, and others have been reactivated after several years of dormancy.

And these chapters have been quick to get involved in supporting the University. Twenty-six of the local organizations have begun Chapter Scholarship accounts which will provide incentives for students from their area to attend Bowling Green. Each chapter is working on a goal of

\$10,000 with their scholarship accounts.

Two of the chapters were recently honored by the Alumni Association and the University for their outstanding achievements. The Columbus and Chicago chapters each received newly created Eminent Chapter Awards.

"These awards are designed to be an incentive for each of our chapters to excel," Weiss said. "Hopefully they will all want to be involved in the competition to be the best, and that will ultimately benefit us as a University and as an Alumni Association."

In addition to fostering support through organized chapters, Weiss said the Alumni Association looks to individuals to sustain tradition, spirit and pride in the University. This year, for the first time, the association presented a Recent Graduate Award to Patricia Wise Spengler, a 1982 graduate who is now a Toledo attorney. The award will be presented to a person who has graduated within the past 10 years, has maintained an active interest in the University and is involved in his or her community. Spengler is chair of the Greater Toledo chapter of the Alumni Association.

"We saw a real need to recognize our recent graduates in some special way for their achievements," Weiss said, noting that most other Alumni Association awards for individuals are traditionally given to those who have been out of school for longer periods of time.

Other new awards for individuals are geared to fostering tradition at the University. This fall the Alumni Association Board of Trustees created an Alumni Legacy Scholarship program to benefit the sons and daughters of University graduates. These one-year awards are to be presented annually to

incoming freshmen on the basis of their high school academic record. Only those students whose mother and/or father is a graduate of the University are eligible. The number of legacy scholarships awarded each year and the monetary value of each will depend on funds available. This year three \$500 awards were presented.

"The Alumni Legacy Scholarships are a response to the many requests we have received from our graduates for such a program," Weiss said. "We hope to enlarge the effort as alumni show their financial support for this new program."

Another new program about which Weiss is very optimistic is the Alumni Leaders Conference. Initiated in September, the conference attracted more than 120 alumni chapter leaders, former members of the alumni board and other volunteers. They discussed programming ideas, received updates on the University and shared their thoughts about the future of the Alumni Association.

President Olscamp; John Martin, admissions; Conrad McRoberts, financial aid and student employment; Jack Gregory, athletics; JoAnn Kroll, placement services; Clifton Boutelle, public relations; and Martha Rogers, marketing, 1987 Master Teacher, were among the presenters at the conference, which will be repeated in February 1989, Weiss said.

Another fall activity, Alumni Faculty Week, attracted 49 alumni to the campus to share their knowledge with students. Weiss said alumni traveled from as far away as California and Massachusetts to teach a total of 64 classes, meet with student organizations and hold countless spontaneous "trap sessions."

Demand great for technology textbook series

Shop classes in public schools are saying good-bye to their "cake course" image and undergoing a change. Instructional techniques are following a new trend which is pushing students toward technology literacy.

Ronald Jones, visual communication and technology, recognized the change taking place in these classes and realized there were not any textbooks adapting to the instructional trend. After co-writing

Ronald Jones

Discovering Technology Communication in 1986 with Dr. Janet Robb of North Texas State University, he proposed a series of books promoting technology literacy to the publisher. The idea was readily accepted and the three-book series has become one of the nation's best-selling public school textbooks on the topic.

Jones acted as consulting editor for the other two books in the series, *Discovering Technology Energy, Power and Transportation* (published in 1987), and *Discovering Technology Production* (due in 1988).

The books were written for the seventh, eighth and ninth grade levels and Jones said they focus on the technology of manufacturing, transportation, construction and communication. "When you break everything down, those four areas are what people do to survive," Jones said.

In one way or another, technology affects almost everything people do, Jones said. "It also influences most of our plans for the future. Consequently, at the present time, many educational institutions are revising their curricula to provide students with a better understanding of what technology is, where it comes from, where it is going and how it affects our lives. In short, as an essential part of general education, technology has at last come of age," he said in the first book's preface.

The series hasn't forgotten the traditional shop class teachings, but the new trend has built upon them. "In the past, we never studied the impact of the tools on the trade," Jones said. "Now we're looking at how things such as computers, telecommunications, history and people in technology affect the use of those tools."

The heavily illustrated books provide a comprehensive survey of the tools, materials and processes that make up technology. While other books on the topic are beginning to appear on the market, Jones said the *Discovering Technology* series has been widely adopted by school systems across the country.

"This was one of the first set of books to address the changeover," Jones said. "The response to it has been very satisfying."

Preview Day set for Saturday

More than 2,500 northwest Ohio high school students, parents and guidance counselors are expected to attend the annual Preview Day activities at Bowling Green Saturday (Nov. 7).

Co-sponsored by the Office of Admissions and the Office of Alumni and Development, Preview Day is designed to acquaint high school students with the various academic programs and services offered at the University.

A feature of this year's event will be a Minority Preview Day which will highlight the opportunities available to black and Hispanic students at Bowling Green.

Preview Day will begin at 9:30 a.m. in the Lenhart Grand Ballroom of the University Union. More than 60 displays of academic programs, student services and activities, admissions, financial aid, cultural groups and organizations will be exhibited.

Guided campus tours will leave the Union every five minutes beginning at 10 a.m. Various academic departments will offer tours of their facilities at 10:30 a.m.

The roof at Kohl Hall is prepared for resurfacing and coating by Mike Zitzelberger of United Roofing and Sheet Metal. Roofing repair work is scheduled for several dorm and office buildings over the next year.

Peregrine Society telefund pledges record \$38,600

Scholarships will be available for more Bowling Green students thanks to the generosity of University supporters this fall.

Members of the Peregrine Society pledged a record \$38,600 during telefunds earlier this fall when current students called alumni and friends seeking private dollars to help fund varied programs. The Peregrine Society maintains an account which funds Alumni Book and Merit scholarships. Members of the Peregrine Society are current-year donors who pledge a second gift earmarked for the special scholarship fund.

Approximately 1,600 "friends," 42

percent of the total number contacted, contributed this year during the Peregrine telefund. David Wu, development, said the percentage of contributors is up 10 percent from last year when approximately \$31,000 was pledged.

Fall telefunds also benefitted the University's Alumni Chapter Scholarship program. A total of \$12,550 was pledged by alumni from the following areas: Arizona, Atlanta, Chicago, Dallas, Fort Myers, Houston, Tampa and the Pacific Northwest. Individual chapters are working toward a goal of \$10,000 with their scholarship accounts. The scholarships will be awarded to Bowling Green students on the basis of criteria

established by each chapter.

Telefunds for the University's Annual Fund, which is still underway, have to-date brought in more than \$140,000 from 4,360 donors. The Annual Fund telefund is still underway along with a telefund to benefit the Parents Club. Alumni contributions to the Annual Fund support scholarships, special awards, departmental and research grants, equipment purchases and activities of the Alumni Association. The Parents Club seeks funding for a specific special project each year.

Telefunds are an annual fall and spring fund-raising event at the University.

Faculty/Staff Presentations

Elmer A. Spreitzer, sociology, **Dean A. Purdy**, student affairs, and **David Chilson**, computer science, presented a paper entitled "Sports Involvement as Related to Familism in the General Adult Population" at the Fifth Canadian Congress on Leisure Research, Dalhousie University, Halifax, Nova Scotia, May 20-23.

Ronald E. Jones, technology, presented a paper entitled "Integrating the Systems of Technology" at the Ohio Industrial Technology Education Association annual conference, in Dayton, March 13, 1987; also, presented the keynote address at the American Industrial Arts Student Association Presidential Forum, in Tulsa, Okla., March 21, 1987.

Benjamin N. Muego, political science, Firelands College, lectured on "The Politicization of the Philippine Military" at the National Defense Intelligence College, Bolling Air Force Base, Washington, D.C., May 18, 1987; also, lectured on "The Philippines: Fifteen Months of Aquino" at the Cleveland Council on World Affairs, in Shaker Heights, May 27, 1987.

Edward A. Schwerkolt, technology, presented an electronic publishing workshop at the University, Aug. 18 & 20, 1987.

Edward A. Schwerkolt and **Chuck Spontelli**, technology, presented a paper entitled "How is Your Color Judgement?" at the annual International Graphic Arts Education Association Conference, in Springfield, Mo., on Aug. 3, 1987.

Ernest A. Champion, ethnic studies, presented a keynote address entitled "Bilingual and Multi-Cultural Education as We Approach the 21st Century" at the annual Bilingual Multi-Cultural Summer Institute, in Findlay, on June 22-26, 1987.

Jerry Streichler, technology, presented lectures on "The Technology Education Movement and Changes in Vocational Education Delivery Systems in Selected States," "Epsilon Pi Tau - The International Honorary Professional Fraternity for Education in Technology" and "Graduate Study Opportunities in Technology and Technology Education" at the Polytechnic University, in Puerto Rico, on June 23 and 25, 1987.

D.W. Chilson, computer science, presented a lecture on "The Complex Network: A Database Definition Dilemma" at the Proceedings of the Digital Equipment Users Society, in the spring of 1986.

L.M. Leventhal, computer science, presented a lecture on "Expertise: A Pervasive But Surprising Theme in Software Engineering" at the annual meeting of the Ohio Academy of Science, in Toledo, on April 25-27, 1986.

Faculty/Staff Publications

Robert H. Byler, journalism, "Festivals Inspire Reunion Bands," and "Bob Erdos Stomps Off 1,000 Classic Jazz Tunes," in *TJ Today*, February 1987; also, "Living the Era of Their Music," "The Well-Schooled Musicians of T6," "Free Sturgis Falls Festival Reaches 10-Year Milestone," and "Jam 87 Swings at Indianapolis," in *The Mississippi Rag*, June, July and August 1987; also, "Gus Statiras — Record Producer & Raconteur," in *IAJRC Journal*, January 1987; also, "D.P. Schiedt Promotes Future, Records History for All That Jazz," in *The Indianapolis Star*, February 1987; also, "Ohio Man Builds Stained-Glass Model of Family Victorian Home," in *Grit*, Vol. 25, May 31, 1987; also, "Stomp Off!," in *Jazz Journal International*, Vol. 40, No. 5, May 1987; also, wrote a book review of *Early Jazz: Its Roots and Musical Development*, by Gunther Schuller in *Popular Music and Society*, Vol. 11, No. 1, Spring 1987.

Faculty/Staff Grants

Marilyn Shrude and **Richard James**, both of musical arts, \$3,380 from the Arts Commission of Greater Toledo, for the 8th Annual New Music Festival.

Larry Smith, Firelands, \$10,000 from the Ohio Humanities Council to produce a videotape documentary, "Kenneth Patchen: An Art of Engagement."

Michael Moore, continuing education, \$3,375 from the Arts Commission of Greater Toledo, for hiring teaching artists from Lucas and Wood counties to continue expanding the Arts Unlimited program; also, \$8,000 from the Ohio Arts Council to pay for the teaching artists who carry the program into the schools.

Relda Niederhofer, biology at Firelands, presented a paper entitled "Edwin Lincoln Moseley: An Internationally Known Naturalist" at the Early Botany in the Trans-Allegheny Symposium, in Columbus, August 11.

David T. Glick, Institute for Great Lakes Research, narrated a slide presentation entitled "Evolution of Lakes Shipping" at the eighth annual fundraising dinner of the Great Lakes Marine and Coast Guard Memorial Museum, in Ashtabula, Sept. 17.

Jane L. Forsyth, geology, gave a lecture entitled "The Geological Setting for Ohio's Natural Plants" at Camp Kern, in Lebanon, Sept. 18.

David C. Skaggs, history, presented a paper entitled "Joint Operations During the Detroit-Lake Erie Campaign, 1813" at the 8th Naval History Symposium at the U.S. Naval Academy, Annapolis, Md., Sept. 24-25.

Thomas S. Edwards, American culture, chaired a session entitled "The Aesthetic in the German-American Press" at the German-American Press symposium, University of Wisconsin, in Madison, Wisc., October 7-10.

Joanne Navin, student health service, presented a paper entitled "Self-Care Agency, Contraceptive Knowledge and Practice in Undergraduate Women" at the American College Health Association Convention, May 1987.

Ray Browne, popular culture, will organize and implement the study of popular culture, Mexican and American style, in Mexico City and various other cities throughout the country, Nov. 15-31.

M.Neil Browne, economics, presented "Factors that Distinguish Campuses that Successfully Integrate Critical Thinking into Their Classrooms," to the annual convention of the Professional and Organizational Network in Higher Education, Kerrville, Texas, Oct. 16.

Dean A. Purdy, student affairs research and evaluation, presented "Determinants of Academic and Social Integration Among College Students" at the North Central Sociological Association meetings, Cincinnati, April 2-4. He also chaired a session on the sociology of sport. In addition, he presented a paper, "A Critical Assessment of Corporate Officers' Attitudes Toward Higher Education" with Beverly E. Baker, EDAS graduate student, at the Midwest Sociological Society meetings, Chicago, April 15-18.

John Piper, health education, presented "The Power of Positive Invitations to Learning" at the "Teach Your Children Well" conference as one of five featured speakers, in Columbus, Oct. 5-6. The conference was sponsored by the Ohio Department of Education's division of elementary and secondary education.

Lee Meserve, biological sciences, "Hypothalamic CRF Immunoreactivity in Genetically Hypothyroid (thytyt) Mice," in *Proceedings of the Society for Experimental Biology and Medicine*.

Robert R. Harr, medical technology, "A Comparison of Results for Serum Versus Heparinized Plasma for 30 Common Analyses," in *Laboratory Medicine*, July 1987.

Jane L. Forsyth, geology, "Geologic History of the Maumee River," in *Northwest Ohio Quarterly*, Spring 1987.

M. Neil Browne, economics, "The Metaphorical Constraints to Pay Equity: Why So Many Economists Are Outraged by Comparable Worth," in *Population Research and Policy Review*, July 1987.

Carmen F. Fioravanti, biological sciences, \$102,260 from the Department of Health and Human Services National Institute of Allergy and Infectious Diseases, a research for the anaerobic energy metabolism of a parasitic helminths.

Candace Galen, biological sciences, \$56,212 from the National Science Foundation to measure natural selection for quantitatively variable flower morphology in the polymorphic alpine plant, *Polemonium viscosum*.

Carol A. Heckman, biological sciences, \$30,574 from the Department of Health and Human Services Biomedical Research Technology Program for the automation of cell image processing and shape analysis.

Michael T. Marsden, popular culture and associate dean of the College of Arts and Sciences, delivered an invited presentation entitled, "The Myth of the West: The Essential American Imagination in Film and Literature," at the 14th Annual Montana History Conference, Helena, Montana, Oct. 24.

F. Scott Regan, presented "What Can Be Expected From the Volunteer Adjudicator?" at the Ohio Theatre Alliance Adjudication Workshop, Columbus, Oct. 25.

Kang-kyun Kim and **James A. Sullivan**, both of applied statistics and operations research, presented "Testing for Agreement with Paired Ranks," at the annual meeting of the Institute of Mathematical Statistics, San Francisco, Ca., Aug. 17-20.

Gary R. Hess, history, presented the paper "The American Strategy of Containment in Southeast Asia" and participated in a week-long conference on international relations of East Asia, in Bellagio, Italy, Sept. 28-Oct. 2.

Bernard Sternsher, history, presented the paper, "Harry Truman and the Polls," at the Mid-America History Conference, at Southwest Missouri State University in Springfield, Mo., Sept. 25.

Kay Moore, music education, performed and presented "Developing Musicality in Our Students" to piano teachers at the Middle-West District of the MTNA-OMTA in Lima, Oct. 6.

John Hiltner, geography/gerontology, **Edward Wood**, gerontology, and **Jean Smith** of the Morgan County Committee on Aging, conducted a seminar on the "Development of Local Funding Sources for Aging Programs and Services by Passing Tax Levies" at the Multidisciplinary Institute on Aging sponsored by the Ohio Department of Aging, Columbus, Oct. 6-8.

Michael Marsden, popular culture, presented the paper, "What is Canadian About the Canadian/American Writer W.P. Kinsella?" at the Ninth Biennial Meeting of the Association for Canadian Studies in the United States, Montreal, Quebec, Oct. 10.

Charles L. Crow, English, presented "The Romantic Naturalism of Jack London's *The Valley of the Moon*," at the Popular Culture Association in the south meeting, Louisville, Ky., Oct. 3.

David V. Gedeon, technology, presented the paper, "Vision-based On-line Ganging and Inspection Systems," at the National Association of Industrial Technology, Nashville, Tenn., Oct. 22.

Gary Hess, history, "Global Expansion and Regional Balances: The Emerging Scholarship on United States Relations with India and Pakistan," in *Pacific Historical Review*, May 1987; also, "The American Encounter with Revolutionary Spain and Russia," in *Reviews in American History*, March 1987; also, "The 'China' of the China Hands: The MacMurray, Johnson and Hornbeck Perceptions of China," in the book, *American-East Asian Cultural Relations*.

Sangjin Yoo, accounting and management information systems, "Software Development and Maintenance" in *International Journal on Policy and Information*.

Rich Wilson, special education, "Direct Observational Academic Learning Time" in *Teaching Exceptional Children*, Vol. 19, No. 2.

Ernest Savage, visual communication and technology education, \$3,000 from the Ohio Department of Education, a supplement for the model industrial technology systems project.

Don Bright, business education, \$235,750 from the Ohio Department of Education Vocational and Career Education, for a vocational education personnel development regional center; also, \$2,700 from the same sponsors for marketing and distribution of the "Marketing Marketing" teleconference.

Donald Deters, biological sciences, \$10,260 from the American Heart Association-Ohio Affiliate, for expression of subunit I of cytochrome oxidase.

In Brief

Take a holiday

Veteran's Day, a holiday for all University employees, will be observed on Wednesday, Nov. 11.

Classes however, will meet as usual on that day. Only those offices which absolutely must remain open should be staffed and then only at minimal levels.

Those offices that will remain open are requested to contact the Office of Public Relations at 372-2616 before 5 p.m., Tuesday, Nov. 3, to report the information for publication in the Nov. 9 issue of the *Monitor*.

Note holiday hours

The University Union will operate under the following hours for the Veteran's Day and Thanksgiving holidays:

On Veteran's Day, Wednesday, Nov. 11, the Union will be open during regular hours.

During Thanksgiving break, the Union will have regular operating hours on Tuesday, Nov. 24 except Prout will close at 2 p.m. and the Pheasant Room, the Bowl 'N Greenery and Pizza Shop will be closed for the evening. On Wednesday, Nov. 25, the building and the information desk will be open from 7 a.m. to 5 p.m. The Nest cafeteria line will be open from 7 a.m. to 3:30 p.m.

The Union will be closed from Thursday, Nov. 26 through Sunday, Nov. 29. It will resume regular hours Monday, Nov. 30.

Power to be out

An interruption of electrical power will occur Saturday, Nov. 28 between 12:30-8:30 a.m. The interruption is due to the need to splice into the primary power line to provide electrical power to the Business Administration Building addition.

The buildings that will be without electrical power are the Business Administration Building, Jerome Library, R-Dorms, the Student Health Center, Student Services, the Moore Musical Arts Center and the Student Recreation Center. Power should be restored to the affected buildings no later than 8:30 a.m.

Opera to be presented

The University Opera Theater will present Benjamin Britten's comic opera "Albert Herring" at 8 p.m. Friday, Saturday and Sunday (Nov. 6-8) in Kobacker Hall of the Moore Musical Arts Center.

Opera activities director Roy Lazarus will direct the production. Robert Spano, director of orchestral activities, will conduct.

Britten, among the most prolific and famous British composers of the 20th century, has based his opera on "Le Rosier de Madame Hussan" by Guy de Maupassant.

Tickets, priced at \$3, \$6 and \$9, can be purchased at the box office between noon-6 p.m. Monday through Friday. Tickets also can be reserved by calling 372-8171. Students can receive a \$1 discount with I.D.

Readings planned

Ohio Town, a group reading adapted by Dr. Ronald E. Shields, theater, from a collection of essays written by Ohio author Helen Hooven Santmyer, will be presented at 2 and 7 p.m. on Nov. 13 and at 2 and 4 p.m. on Nov. 14. All programs will be in McFall Gallery.

Each reading will be accompanied by an exhibition of photographs and original artwork prepared by Margaret McCubbin, theater; Ann Bowers, Center for Archival Collections; and Randall Horst, art.

Tickets are \$1.50 at the door.

The group reading will be featured as part of a day-long conference, "Ties that Bind: Women, Culture and Community in the Works of Helen Hooven Santmyer," to be held Nov. 14.

Play presented

The University Theater continues its 1987-88 season with *...And Ladies of the Club*, a readers theater adaptation by Dr. Lois Cheney, theater, of Helen Hooven Santmyer's novel.

The nostalgic look at small town life in rural Ohio will be presented at 8 p.m. Nov. 11-14 in the Joe E. Brown Theater, University Hall. Tickets are \$1.50 and are available only at the door.

Professors noted for racial understanding *Datebook*

Two University professors, St. John's High School in Toledo and the Toledo Alliance of Black School Educators were recognized Oct. 23 for their efforts to promote racial understanding.

The Awards for Promoting Racial Understanding were initiated this year by the College of Education and Allied Professions to recognize organized programs and individual activities in schools and communities, as well as on campus. Dr. Roger V. Bennett, dean of the college, presented the awards at a dinner meeting of area teachers and guidance counselors at the Holiday Inn in Bowling Green.

"The groups and individuals recognized by this awards program have made outstanding contributions to provide minority students with greater educational opportunities," Bennett said. "We hope that, by applauding their example, we can encourage others to adopt their ideas."

Bowling Green faculty members receiving the awards were Dr. Conrad Pritscher, educational foundations and inquiry, and Dr. Clifford Brooks, educational curriculum and instruction, who were responsible for the formation last February of People for Racial Justice, an informal committee of faculty, students and Bowling Green residents, devoted to the promotion of racial understanding and the improvement of recruitment efforts for minority faculty and students.

Pritscher teaches courses in educational philosophy and education in a pluralistic society. Brooks is coordinator of the University's developmental reading program, designed to help students improve their reading comprehension and

study skills as they begin college studies.

St. John's High School was recognized for its work in recruiting and retaining minority students. During the past two years, the school has worked closely with leaders of the minority community to develop recruitment programs that have succeeded in tripling the number of minority students enrolled at St. John's. Its minority enrollment of 18 percent is a reflection of the minority population of the Toledo area it serves.

The school also hosts two summer day camps for minority students--one focusing on computers and another on soccer. In addition, St. John's sponsors a summer enrichment program for minority students going into the seventh and eighth grades and has initiated a media program directed specifically toward minority students and their families.

The school staff includes a Tutoring Center Coordinator and a transitional counselor who assist students in their adjustment, both academically and socially, to St. John's.

The Toledo Alliance of Black School Educators, an organization formed in 1978 to promote quality education for all children in the Toledo Public Schools, was recognized for its efforts with African-American children.

Members of the alliance have sponsored an annual Parent Home-Help Workshop as a follow-up to parent-teacher conferences in the Toledo Public Schools. The workshop provides parents with ideas on providing reinforcement of their children's studies,

methods to make homework more interesting, and ways to achieve better study habits.

The organization also sponsors a public program during Black History Month to emphasize historical and cultural contributions of African-Americans to American life.

A third effort of the alliance is the encouragement of minority students to pursue careers in teaching. Nationally, the percentage of minority students in elementary and secondary schools is increasing, while the percentage of minority teachers is decreasing. The alliance has also contributed \$600 to the United Negro College Fund over the past two years.

Nominations for the Awards for Promoting Racial Understanding were evaluated by the Standing Committee on Minority Faculty, Staff and Students in the College of Education and Allied Professions. Entries were judged on the basis of the duration of the program or efforts, communication with important publics, participation, scope and provision for evaluation.

The awards were presented in conjunction with a weekend conference for school guidance counselors and area teachers, also sponsored by the College of Education and Allied Professions at Bowling Green.

The conference theme was "Preparing Minority Students for Higher Education." Dr. Patricia Ackerman, president-elect of the National Alliance of Black School Educators, presented the keynote address on Friday evening.

Student Health Services held its first Health Fair Oct. 27 which featured more than 30 displays and information booths sponsored by community and campus organizations. Members of the Bowling Green and University community were able to undergo a number of health tests and ask questions on everything from heart disease, to blood pressure and AIDS. The fair is expected to become an annual event.

Monitor

The Monitor is published weekly by the Office of Public Relations for faculty and staff of Bowling Green State University. The deadline to submit material for the Nov. 9 issue is 5 p.m. Tuesday, Nov. 3.

Safe drinking water forum topic

Is the drinking water in Bowling Green safe? The Environmental Protection Agency says the water meets all of its standards, but does it? And even if it does, is that safe enough?

Those questions and others will be answered on Monday (Nov. 2) when a forum featuring four local and state water experts will examine "BG Water: Is It Safe to Drink."

Free and open to the public, the lecture will be held at 7:30 p.m. in the Assembly Room in McFall Center.

Forum panelists will be David Baker, director of Heidelberg College's Water Quality Laboratory; Ed King, supervisor of the division of public water supply for the

state EPA; Ron Merrill, superintendent of the Bowling Green water treatment plant; and Gary Silverman, director of the University's Environmental Health Program.

Topics to be discussed include the quality of water supplies in northwest Ohio, health issues associated with water-borne pollutants, and the technologies and regulations associated with water treatment.

A question-and-answer session will follow the program.

The forum is being sponsored by the University Center for Environmental Programs and the Environmental Interest Group.

Eight employees to retire Nov. 1

Eight University employees will be retiring as of Nov. 1 as part of the Early Retirement Incentive Program.

Retiring this month are Roscoe Cron, custodial services; Donna Otley, Student Health Center; Della Rider, custodial services; Doris Barr, bursar's office; Joan Potter, food operations; Wayne Keller, electrician shop; Annette Rideout, College

of Education; and Dorothy Roberson, custodial services.

The retirement program runs from July 1 to June 30, 1988. It provides for the purchase of up to three years of retirement service credit of five percent of the University's PERS membership, which will accommodate approximately 75 participants.

Statistics conference on Friday

The University will host the fourth annual Ohio Statistics Conference Friday (Nov. 6).

At the conference, which is being held at Bowling Green for the first time, representatives of graduate programs in statistics in Ohio will introduce undergraduates to the field and encourage them to pursue graduate studies. About 100 people are expected to attend.

Dr. Thomas Lorenzen of General Motors

Research Laboratories will present one of the keynote addresses entitled "Statistical Quality Control--Charting Our Way to New Frontiers." The other keynote address, "Games, Sports, Gambling and Sex: Who Says Statistics is Dull?" will be presented by Dr. Don Berry of the University of Minnesota.

Conference sessions from 9:30 a.m. to 2:45 p.m. will be in the Towers Inn Room of McDonald. From 2:45-3:30 p.m. the conference will move to the fourth floor of the Mathematical Science Building and the 3:30-4:30 p.m. session will be in 220 Mathematical Science Building.

Drug testing is topic of lecture

Dr. Dianna Stone, psychology and business, will speak on "Individuals' Reactions to Organizational Drug Testing Policies" from 3:30-5 p.m. Thursday (Nov. 5) in 112 Life Sciences.

The lecture is being sponsored by TARP's Committee and is free and open to the public. For more information, contact Romy Nocera at 372-2301.
